# 2025 RAM 1500

## THE STRONGEST RAM 1500 EVER

THE NEW 2025 RAM 1500. Built to deliver upon the legacy of the Ram Trucks that came before it, the new 2025 Ram 1500 is roaring in with a redesigned exterior, an even more sophisticated and luxurious interior, a bold new powertrain under the hood, and technology at nearly every turn. Available in a High Output or Standard Output, the new 3.0L Hurricane straight-six twin turbo engine helps make this Ram 1500 not only the strongest, but more importantly, the most refined yet.

The top of the range new Ram 1500 Limited continues to raise the bar in the full-size pickup segment with the introduction of massaging front seats. From jobites to highways to driveways, the new 2025 Ram 1500 is still built to serve those behind the wheel. One test drive and not only will you experience serious power (540HP in fact), you will experience both an evolution and a revolution of the truck that fans have depended on for years.

Overseas model shown.

\*19 Speakers including subwoofer and six coaxial two-way speakers strategically mounted in 12 locations throughout the vehicle

\*Maximum braked towing capacity is subject to regulatory requirements and vehicle weight restrictions (which may require occupants and/or luggage to be restricted)

\*Payload and kerb weight figures are based on vehicle certification. It is the driver's responsibility to ensure weight of fully loaded vehicle does not exceed GVW, front and rear axle load limits are not individually exceeded, the combined weight of the fully loaded vehicle (including tow ball download when towing) and trailer does not exceed the GVW, compliance to State and Territory towing regulations. Payload is the combined value of occupants, luggage, cargo, added options, accessories and tow ball download (when towing). Kerb weight includes the vehicle with a full tank of fuel and all standard equipment, excluding occupants. Additional weights of optional features, occupants, luggage, cargo, accessories and tow ball download (when towing) must be taken into account when calculating payload.

\*Figures according to ADR 81/02 derived from laboratory testing. Factors including but not limited to driving style, road and traffic conditions, environmental influences, vehicle condition and accessories fitted, will in practice in the real world lead to figures which generally differ from those advertised. Advertised figures are meant for comparison amongst vehicles only.
